

Modern Christianity and Today's News on Health – Paulinian Epistle and Public Healthcare

By Shomit Sirohi

- I. What then is our Health – is liberation about Health – what is a balance-sheet on Health, and in fact we demand Kingdom of God, which then is our saviour Christ, who has lived ill and won in Periods of his Life – the Highest Franciscan Life of Health, but also a Wealthy Process which then is a simple Ornament of a Bag full of Liberation Documents

I meant of course the whole public healthcare system is based on exploitation if it cannot emancipate. It also means that private healthcare can also be expensive. In this simple sense the Bible is a search for good news on the subject of health. In this simple sense modern capitalism is sophisticated enough to produce a medical recovery of all subjects on health, disease and such Miracles Christ performed with water or even bread. This means to the Jewish faith a promise on such details of health. From cooking, to clothing we demand a wealth with the correct promise of liberation and letter, the Arabist is the same Arabized.

- II. Today's Good News – with in fact a beautiful Soviet description on Objectivity on the matter

In fact we can be said to be objective – it is not a constant process of realisation as Buddhists would argue among us. But is realisation, and sensation and knowledge, in fact full knowledge – even Journalism, and Literature and Philosophy which is merged with Pope in India as in fact living among a Parish of a Young man who seems to be declared Christ.

For what?

Three axioms for now from Paulinian Letter –

- I. Deterior capitalism with its objectivity.
- II. People in pure health after years of ill health.
- III. Diagnosis and Cure.
- IV. In fact wealth and banking.

Three axioms with one excess.

That then is the bags in Christ – documents on Health and Modern Architecture which is Christian Life which means in fact Kingdom come – Christ is in fact our saviour, and that is a fact.

'St. Matthew appeals to all before – Christ performs a miracle – now live.'
